TENITTY

Sample Security Assessment Report

Demonstration report structure and illustrative findings

Sample report structure

This is a demonstration template, not a client report. Findings and results are illustrative.

ID	Finding	Severity	Business impact	Treatment
TEN-001	Broken access control	High	Potential unauthorized access to another user's resource	Enforce server-side object authorization
TEN-002	Overly broad service permissions	High	Unnecessary blast radius if credentials are compromised	Reduce IAM permissions and separate roles
TEN-003	Missing security event coverage	Medium	Reduced visibility during suspicious activity	Centralize relevant authentication and application e

Recommended finding format

• Finding title and identifier

• Severity and rationale

• Affected assets

• Technical evidence

• Business impact

• Attack / abuse scenario

• Remediation recommendation

• Owner and target date

• Retest / validation status
