

Statement of Work Template

Editable engagement structure

Engagement objective

Provide a clearly scoped security assessment with documented findings, business risk context and practical remediation guidance.

Scope

- Client-defined assets and environments listed in the final scope
- Application, API, cloud, infrastructure or risk controls only where expressly included
- Testing windows and constraints agreed before work begins

Deliverables

- Assessment findings
- Risk register
- Executive summary
- Remediation recommendations
- Final report walkthrough
- Optional retest / validation

Client responsibilities

- Provide accurate scope and access
- Confirm written authorization
- Identify sensitive production constraints
- Provide emergency contact
- Respond promptly to critical findings

Change control

Any material change in scope, testing method, assets, timing or deliverables should be documented and approved before execution.
